Gun Towing N. Wales

Drivers are students of the Military College of
Cwmcemaes & are undergoing instruction as instructors in the
various branches of mechanised transport particularly
for fast mobile warfare & anti-invasion work.
They contain a fair proportion of ~~an~~ officers & some
N.C.O.s from the dominions. The film shows a
very heavy 6 wheel lorry being driven over the
typical hill country of N. Wales. This lorry drives
on all 6 wheels - the smaller ones drive on all 4.
When the gears stuck on the hillside the lorry
went on ahead & then towed the gun ~~down~~
uphill by a cable. (By this means the lorry
could haul itself up if necessary) The vehicles
were driven anywhere that was suggested.
They were merely assembled at one point,
their destinations pointed out to them & told to
go!! The drivers have had about a
week or so tuition in some cases. Most
of them were on the motor cycle section of the
course shot last Thursday.

Story would have been much better
with better weather during the morning
conditions of almost nil visibility & driving
rain spoiled some interesting material
