

U.S. BEATS SCHEDULE FOR TWO-OCEAN NAVY.

Issue No. 1803...24..9..1941  
Title: Buccaneer.  
Track: Ditto.

Lines: Bidwell.  
Voice: Mellor.

The 35-thousand-ton North Carolina is the newest addition to the U.S. Navy, which plans naval supremacy in both the Atlantic and Pacific. On firing tests to see how she can take the strain, Captain Hustvedt ordered up his planes to get them out of the way of the shock.

(SMOKE FROM FUNNEL) Designed for 27 knots, North Carolina is 729 feet long, 108 amidships.

-----  
(AFTER BUGLER) Action Stations! As for battle, hatches were battened down, port-holes closed. First test was with her secondary armament of five-inch guns.

( FOUR SCENES WITHOUT VOICE)

(GV BATTLESHIP AT DUSK) At nightfall North Carolina faced her biggest test - nine sixteen-inch, ten five-inch in the greatest broadside ever fired.

-----  
(LV TOWARDS) Triumphantly O.K., North Carolina takes her place in the line. And, thanks to President Roosevelt, that line now stretches across the Atlantic to help strangle Hitler.

-----
