

## FLASHES!

America's reply to the Comet may be ready for test by September. Boeing's B-707 is the first jet airliner built in the States. She'll weigh 95-tons and carry 150 people from New York direct to London in just under 7 hours. That works out at 550 miles an hour.

Visiting Marrakesh the Sultan of Morocco ~~is~~ to go to the Mosque to attend the Friday prayer. He was accompanied by the Pasha of Marrakesh, El Glaoui. 15-minutes

- afterwards, during the prayer, the Sultan was wounded by a bomb. Fortunately the ~~Sultan~~<sup>13</sup> sustained no more than a slight wound on the forehead. He had a great reception from the crowd.... One man was shot down. They weren't sure he was the culprit but it helped to restore order.

NEARING COMPLETION ... AMERICA'S FIRST JET TRANSPORT

128 feet long, a wing spread of 130 feet; the ultimate size of the B-707, jet transport nearing completion in Seattle, Washington!

The first of its kind ever built in America — England has been operating jet airliners for some time -- this most powerful air giant is expected to be finished in September, after more than two years at a cost of 15 million dollars.

The B-707, which will weigh 95 tons, fully loaded, can carry 150 passengers at 550 miles per hour. Coast to coast in less than 5 hours — London in less than 7 hours! -- in America's newest sky Ship!
