

TORBAY - LISBON SAILING RACE

7 The Swedish barquentine "Flying Clipper" and the Portuguese navy's three masted
barque "Sagres", her crew already aloft, move out of Dartmouth for the start of the race
to Lisbon.

21 The cadets aboard "The Moyana" the Southampton School of Navigation's ketch made sure
that everything was ship shape and Bristol fashion.

40 The Swedish Navy was represented by the Schooner Falken. Altogether 22 ships under
sail had assembled in Torbay making one of the loveliest sights that had graced our shores
for many a long day.

55 The starting ship was H.M.S. Jewel and it was her gun that told the ~~the~~ crews the race
was on.

67 Belgium had an entry in the three master Mercator while the Creole manned by cadets
from the Conway, the Worcester, Dartmouth and Pangbourne was Britain's main hope.

88 The ~~Welsh~~ Danish full rigged ship Georg Stages.

94 The Norwegian Sorlandet was the only ship competing which had no auxiliary engine.

~~The OBJECT OF~~
The race is to develop the brotherhood of the sea, ~~and to help train young men. The Sagres~~
~~carried the cross all Portuguese ships have borne since the days of Vasco Da Gama.~~

109 Another Norwegian entry was the splendid square rigged ship the Christian Radich ~~of~~
800 tons.

123 From the air the ships looked small and lonely on the great waters, but the hearts of
the men who sailed them were as stout as their forefathers who sailed such tall ships around
the world in days gone by.
