

DESTROYERS.

390

Barrow --- three torpedo boat destroyers built for the Argentine Government were launched at the Naval construction yard by South American Society ladies. In addition to Britain's own re-armament programme, our shipbuilders are also able to cope with orders from abroad.

SUBMARINE.

H.M.

Chatham --- ~~His Majesty's~~ Submarine "Sterlet" was launched by Mrs. Walbot, wife of Admiral Walbot Director of Dockyards.

The Sterlet is in the pocket class, being of 670 tons displacement only. Submarines aren't very popular these days ----- but this is only a little one.

POLO.

Long Island --- New York society flocked to Meadowbrook to watch an international match. To play polo well you have to be able to ride like the wind and fall like the rain. But there were so many socialites and film stars present the players came over dizzy, and came down in showers.
