SINKING FREIGHTER.

Boston --- The British Freighter City of Salisbury struck a reef while entering the harbour, and the impact split her in two. She was a circus ship bound from Bombay with a cargo of birds, monkeys and snakes for American Zoos. [The menagerie was saved, but in the morning the freighter was abandoned as a complete wreck.] ~~in~~ Imagine spending the night in an open boat with birds, monkeys and snakes.

MODEL AIRPLANES.

Farmingdale --- a model rally attracted all the air-minded ~~and~~ young men at Long Island, and the models they flew were just like the real thing. All of them went up and all of them came down but some nearly parted the spectators' hair. They're only toys -- but some of these hair-raising crashes are too realistic for comfort.

SIX-DAY CYCLE RACE.

Wembley --- the six-day bicycle race --- they start pedalling on Sunday and ride round and round till the following Saturday. They make a lot of money but they feel like a gramophone when the needle gets stuck. *affie - turn that thing off!*
