

DIVING, CHILDREN AND AQUARIUM.

~~Swims~~ champions of Japan are preparing for the Olympic Games of 1940 which were going to be held in Tokyo. Now it seems unlikely that there will be any Games in Tokyo, but the girl divers keep on preparing just the same. Paris held a swimming fete for children --- tiny tots of the gay capital flung themselves into the water with all the abandon of French youth. ~~And the boys were dignified.~~ And here's a Nature study from Florida, where they've opened a new luxury aquarium. In Florida the girls are so pretty the fish come up to look at them. This is a dolphin, which may surprise those who thought a dolphin was the son of the King of France. It's an unusual picture altogether --- the fish come up when the girls feed them, but mere man has to go down to them before they'll bother to eat ~~it~~.
