

ARMoured CAR.

A new kind of mechanical monster for times of war has joined Uncle Sam's Army. It's a five-ton tank, equipped with three machine guns and an automatic cannon firing two shots per second. It has a top speed of 114 miles an hour --- and in the event of ~~war~~ war it would be used as an anti-aircraft unit.

Now here's a peace-time motor-car. And an Indian Chief shows you how the polite passenger should take a lift. If he travels this way he doesn't distract the owner while he's driving. And another thing --- if you don't like the way the owner drives you can get off without hurting his feelings.

Now he's got a stone in his shoe.
