At Lake Mohawk in New Jersey, a new machine for making a high dive easy. What's easy about it? It's easy because once they release the spring new mithematical properties of the form of the spring new mithematical properties of the form of the spring of t

Not far away at Jones Beach New York therejone a display of aquaplaning. They're all experts. Part of the display consists of doing a high jump --- the trouble starts when they come down.

And here comes the star -- he's done it! Hold it!
