

DIVING AND AQUAPLANING.

At Lake Mohawk in New Jersey, a new machine for making a high
dive easy. What's easy about it? It's easy because once they
release the spring ~~you either die or break your back~~ *— you Dive.* ~~have to dive~~

Not far away at Jones Beach New York there ~~was~~ a display of aquaplaning. They're all experts. Part of the display consists of doing a high jump --- the trouble starts when they come down.

And here comes the star -- he's done it! Hold it!
