

D 717

FILM CENSOR.

2 Mr James Montgomery, the Film Censor, has retired, after splendid work spread over 17 years of service. He has seen altogether 17,000 miles of film. What fun he must have had! In this time he has watched the films grow and develop, and has jealously guarded the interests of the public without pandering unduly to the dictates of Mrs Grundy.

Mr Montgomery will continue to attend the office in an advisory capacity to his successor, Dr Richard Hayes.

TOYS FROM WASTE.

It's such a good idea--- instead of the contents of the waste paper basket being chucked away, they can be made into useful toys.

And the man who sees to it all is Mr H.V. Lanchester. For instance, a baby chair can emerge from a tomato crate, ~~cradle from a crate of cheese~~ and from coloured cotton reels, *A crate from a cheese crate* you can have a first class roller. ~~Then a cigar box turns into a perfectly good truck, wheels and all.~~

There's no knowing what ~~junk~~ can be done with a bit of old junk. But here they know what to do with it, and whatever they make, it's sure to be ingenious.
