

THE NEW DEVICE FOR SHOPPING.

Our cameraman has discovered the latest fashion amongst shoppers, - the walking stick trolley.

3 It's really a splendid idea -- for carrying all the parcels home from the shops. Instead of dropping potatoes about the place on the way home, all you've got to do is to stick them in this. Now shopping will be a pleasure, rather than a business.

So put all your eggs in one basket, and carry them safely home. It would be a grand idea to have a thing like this when you're meeting mother-in-law at the station.

THATCHING IN BEDFORDSHIRE.

Here is John Walker -- 70 years old ~~xxxxxxx~~ craftsman at work on an old cottage in Bedfordshire.

8+ The art of thatching is becoming a rarity these days. It's a pity, for besides the comfort and warmth to be had from homes like these, they're so picturesque in a world of modern creations.

Thatching requires skilled labour and many different tools are used in it's execution. It's hard work too for this veteran -- for he has a good bit of climbing about to do---

But he wouldn't exchange it for all the kingdoms on earth. It's nice to see that there are still cottage homes like this that defy the passing of the years.
