

The Boy whose motto is "I Serve"

902564

To one small boy in Britain these summer holidays will always be a wonderful memory. For just before he came home from Cheam School (having done particularly well in geography) he heard his mother announce that she had created him Prince of Wales.

Her voice had been recorded on tape while she was ill at Buckingham Palace and broadcast to the crowds at the closing ceremony of the

~~Commonwealth and Empire Games, in Cardiff. WHICH ONE THEIR ORIGIN TO SCHOOL GAMES SUCH AS THOSE PLAYED AT CHEAM~~

Never in Britain's history had such an announcement been made in such circumstances. Almost from the day of Prince Charles' christening,

the Queen and Prince Philip have been planning the training and the education of their son to equip him for the duties that one day

he must undertake. ~~AND NEVER HAS AN HEIR TO THE THRONE~~

~~BEEN GIVEN A START ON SUCH DEMOCRATIC LINES~~
While he was a fascinated little onlooker at great ceremonial

occasions ~~(looking over the wall of Clarence House)~~ Or watching

the scarlet clad Guardsmen ~~AND GIVING THEM A~~ giving his mother a birthday salute at

the Trooping the Colour ceremony....of an enthralled spectator

~~sitting~~ In Westminster Abbey at the Crowning of the Queen

or ~~playing~~ with his sister, Princess Anne - all the time the plans for

his future were taking shape.

Lessons gave way to holidays but all the time he was learning.

At Balmoral he played family games like any other small boy - learning to give and take as well as enjoy himself.

And at a Sale of Work, he gave his Father a hand - a sort of unofficial entry into that life of public functions which will be his when school days are over.

And like any other small boy, he gets a lot of fun with the animals. ~~THOUGH THIS CALF SEEMS A BIT OF A~~ HANDFUL

It's all part of the business of growing up with a wide range of interests and that common touch which everybody believes will enable him to give a full meaning to his new motto - the Prince of Wales's motto - "I Serve"
