

58/97.ATOM POWER FROM BRITAIN:

A big day in Latina, both for Italy and Britain. Sir Claud Gibb, Chairman of the Nuclear Power Company, of Knutsford, Cheshire, was shown by model what will be the layout of the thermo-nuclear power plant the Company is building. The British Ambassador took part in the ceremony of laying the foundation stone. It will be the first atomic power station in the world to be erected by one country for another. It will cost twenty-million pounds. In 1962 the power station will have an output of two hundred megawatts.

## ATOM POWER FROM BRITAIN
