DIPHTHERIA TRAILER

This boy is not expected to live. He was not immunised. Every year three thousand children die like this from diphtheria. This child need not have died. He could have been immunised and so protected against diphtheria. See what happened in Scotland last year. 1,200,000 children, two thirds were immunised, attacked by diphtheria. Of those immunised only one died, of those unprotected over 400 died. Stop this needless death. Immunisation does not hurt, does not make your child ill. You can get it done free. Make sure your child is done.
