AMERICAN "AIRMADA" - Mammoth gathering of
army aircraft honours popular governor of
the "sunshine state".

-California-

Picture:- One hundred of America's latest type army
aeroplanes assembled for Spring manoeuvres, give a sky
parade in honour of California's popular governor Mr. Jim
Ross, staying as guest of Colonel Arnold.

He's come to dedicate the new Bridge.

This kind ness has caused Hollywood's country
to make a fuss of him.

The engines started, one hundred machines--

--begin to move, guided by skilled hands of America's
best pilots. Clumsy--

--as owls on the ground, but graceful as seagulls once
they take the air. This isn't a case of just looking
at them.

The camera takes you up to get the--

--thrill of this mammoth, chance of--

--a lifetime show. I said show, but it's more than
that ! It's a demonstration of air efficiency and
preparedness of the United--

--States army. This close formation flying is
wonderfully carried out.

California's Governor with Colonel Arnold
follow--

--the flight of these human driven sky eagles.

Well, science has now conquered the--

--earth, sea, and air ! What's the next job ?
