

GANGSTERS, BEWARE ! American policemen get fit
for their eternal battle against law breakers.

-New York-

Picture:- American Police recruits' drill is a thing
of joy for the visitors to the training--

--quarters. They do this intensive ground work--

--for six months before strolling the streets with a
truncheon in one pocket and--

--a gun in the other. These movements are typical--

--of the alertness of the modern officer of the law.

A round about way to reach--

--physical fitness, but there's nothing giddy about
these recruits.

If a row does happen, and it sometimes--

--does in America, the whistle brings--

--cops at the double, and the law breakers are
just swept away like the cheap unwholesome
trash they are !
