U.S.A. 1,000 B.C. ! Archeologist discovers  
relics of a civilization that existed in American  
3,000 years ago !.

-Kentucky-

---

Picture:- America is being rediscovered. It's a  
different America--

--from the one Columbus died of starvation for--

--finding. Those gitsley remains being--

--unearthed at Kentucky date back one thousand years before  
Christ. A house--

--has been built over the spot to protect the as yet--

--unearthed ancient civilization. Remains of great  
archeological value have already been found. Human--

--bones have formed completely articulated skeletons  
of a long--

--dead race. Fragments of brick built walls,--

--arrow-heads, with delicately carved ornaments in  
an amazing state--

--of preservation have rewarded the efforts of the  
excavators. It's a gruesome, as--

--well as an interesting job. A spade--

--may turn up eerie things like this at any moment.  
Brrh ! Urrh ! Steward, my smelling salts !
