MAKING MONEY -- Intensive activity at  
Bureau of Engraving, showing how America tackled  
the problem of money shortage.

-U.S.A.-

---

Picture:- The one busy place in New York ! A Bureau of--  
--engraving and printing. The only business in the State  
which is making real--  
--money. In fact, if anyone else tries--  
--to make it this way, they will be sent up the river for--  
--twenty-years to live at the State's expense. Federal  
reserve bank notes--  
--are being turned out at the rate of six-million per day.  
And if--  
--a hard-pressed tailor gets six of these on account  
he will think he's lucky !

Yes ! That's what they use for money in America.  
It's being sent out--

--to the Banks in armoured waggons under police  
escort in case bandits think of making a surprise  
collection. That--  
--new money is President Roosevelt's answer to  
the--  
--cash shortage crisis. It has restored confidence  
by bringing hard--  
--cash back to the vaults, and the--  
--poor starved banks wax fat again.
