

TAKE COVER!
AUSTRIAN TOWN TESTS AIR-RAID DEFENCES.

Picture.:- Most continental countries are making tests on their air--

--raid defences. Here is a full--

--rehearsal in a town near--

--Vienna. The enemy is sighted, the alarms--

--have gone, and police hustle--

--the inhabitants into buildings and protected--

--places. Planes fly into an--

--area covered by gun fire. Archie's bark, and shells begin--

--bursting in the air.

A trained gas mask--

--squad rushes to stations. Quick firers--

--begin their ear racking rattle.

Louder crashes herald the diabolical dropt--

--bomb. Gas clouds spread--

--poison and death through the streets. Then the bell --

--rings out "all clear".

And the cleaning-up process --

--commences. Special fluids are spread--

--over the streets affected--

--by the gas to kill their murderous gang over.

And that's how Austria intends to--

--protect her people--

--from air attacks - - if, and when !
